

## **Presentation request by David Tremblay**

Items for discussion with the members the council of Lakeshore

1, historical facts of why we became one amalgamated municipality

2, need for accountability to the residence of all the municipality

3, answer the questions most often asked after 20+ years of amalgamations

Such as : did the reduction of cost and the great savings of money that we were told that would be achieved happen compare the total budget at the start of amalgamations to today budget total increases in taxes;

did the service increase in all area yes or no and how or why

What area of service were streamlined did we see reduction in staff or increase:

have the identity of the communities been protected or have we been trying to assimilated all into one:

has accessibility to are elected council members increased or decreased:

what and where is the source of revenue coming from residential, commercial, industrials farm and utilities how much from each ward:

the cost related to these revenue stream ex cost of sewer for residential compare to farm or policing for commercial compare to utilities;

has the participation in the decision making increase or decrease (public meetings } to the people believe their voice is being heard or to the think it's a done deal no one cares

4, how do we determine if this force marriage is still viable or is there a better solutions,

A municipality, city, town, village or hamlet is like a home not a house. It's not important how big it is, how much it costs, what color or even where it is built. A home is where stories are shared history is made struggles are lived and battles are won where friendships are made thru common likes and needs and the place you know and want to return to Some of us have been very fortunate to have lived in both great homes and great municipalities I just wish that more can experience these two things

I do not expected an answer to these questions tonight but ask council to support the request for that these questions be studied and that a report be brought back to council

merci David de Paul de Louis de Edwouard de Edwouard de Jean Basptiste Tremblay
